

RESEARCH POSITION TO WORK ON

SOLAR CELLS

at the Centre d'Investigacions en Nanociència i Nanotecnologia (CIN2, CSIC)

May 1st, 2008

We are seeking personnel for a one-year contract to develop solar cells, especially Dye sensitized solar cells. The work to be developed involves the development, fabrication, characterization and testing of photovoltaic systems.

Personnel profile: Chemist / Chemical Engineer

Requirements: experience on one or more of the following areas of expertise will be evaluated: photovoltaic systems (organic or inorganic) , dye sensitized solar cells, electrochemistry, electrochemical characterization techniques, spectroscopy. Other: Labview or similar.

Fluent Spanish/English are required.

Conditions: The work will be carried out at the Centre d'Investigacions en Nanociència i Nanotecnologia (CIN2, CSIC) and includes collaboration with industry.

Duration: One year contract with the possibility of contract extension or incorporation to industry depending on results.

Starting date: September 2008

Please send a complete CV, statement of career objectives, and the names and address of three referees to:
